NL Planning Board Members,

I am writing this email to ask that careful consideration be taken in scheduling a public hearing for the Tilden Project. The latest document that was published has a lot of information to sift through. I truly think the public should have time to review the documentation thoroughly before a public hearing can be issued. In the last engineer report it seemed there were many issues to work through. It would be helpful for the public to see the engineers stated issues/problems, and the developers answering/explaining said problems.

In fairness to the community and for the public to be truly informed, clearer, concise documentation needs to be available for review. There also needs to be time for the review.

Thank you for your thoughtful consideration,  
Deanna Pratt
