The Tilden Project

I would love to see the Tilden Commons become a reality! More than any other possible use of the property, this project would have the greatest economic and community building impact. The concept of affordable housing is something our community is in dire need of - for families and seniors it would be a blessing. Our town needs a grocery store for sure. A solid community project like the Tilden Commons will enhance the character of our town. It would become a positive force to helping our residents to bond and join in activities together. I also believe that this Tilden community would not be an attraction to people who are into drugs. I don't see how they would want to be hanging out in this safe community enclave.

In summation, the Tilden Commons Project should definitely pass the planning board and be built as soon as possible.

Unfortunately, I cannot be at the meeting but I did want to express the sentiments of myself and my family.

Thank you,
Tricia Rosen
