To the Planning Board,

I am writing this letter to express my concern over this project once again. Please reconsider your approval of this project as it contains too many red flags. There are too many variances, ethics violations, missing documents and untrue statements by the presenter.

Please table this project as the sense of urgency should not affect a rash decision. Take more time to review what is being presented, as there are so many documents missing, there should be no doubt that more time is needed.
This is not a project that should be rushed through. There is no harm in taking more time to review a project of this size for the benefit of the town. The town is depending on you to do the right thing. There is no need to approve a project of this size in record time. These projects normally take 5-10 years for approval. This is very important to those surrounding this project as they will have no recourse for a wrong decision. It could very well destroy living conditions on many levels for those around it.

Put yourself in the proximately of this project, would your decision be the same? What if your well stood to be contaminated?
What if your streets stood to be constantly flooded? What if the town library could no longer be used for functions?
Too many disastrous consequences could happen with this project and the lack of research before the determination. It is very important that you put the brakes on this project and get all the ducks in a row.

Thank you,
Rick Stall
